

BATTLESTAR FAMILIARIZATION

This section is designed to make your life aboard the Galactica easier and more efficient. It includes complete layouts, particulars, and crew complement.

The Galactica is the primary element of our fleet. At one time, there were twelve Battlestars which were the colonies primary defense. Now, we depend on the Galactica for everything.

The Galactica is completely manned at all times. Duty is divided into three watches. A normal watch is 8 centons. It was designed for long rang transport of viper attack craft. It contains complete repair and maintenance facilities, for these fighters, and also carries shuttlecrafts.

Battlestars are equipped with a number of recreational facilities for its thousand member crew. These include four (4) Triad courts, four (4) officers clubs, eight (8) recreational areas, and four (4) gymnasiums.

Stored in its landing bays are 20 shuttlecraft, which can carry 42 persons, as well as two landrams and assorted power sleds. The shuttles also carry cargo.

The Battlestar Galactica is designed with fire walls between compartments to withstand attacks, and all decks have their own gravity control, anti-acceleration, and anti-radiation fields. As you will see from the layouts, the pilots' quarters are located on the same deck as the launch bays, and shuttle cars are used by pilots to get to the launch bay in emergencies.
