

JUPITER 2 OPERATORS MANUAL

Heading the expedition will be Doctor John Robinson, Professor of Astrophysics at the University of Stellar Dynamics. With him, will be his wife, Doctor Maureen Robinson, the distinguished biochemist of the New Mexico College for Space Medicine; their daughter, Judith, age nineteen, who has rather heroically postponed all hope for a non-scientific career on Earth. Their son, Will, who recently was graduated from the Camdo Canyon School of Science at the age of nine, with the highest average in the school's history; and their daughter Penny, age eleven, I.Q.--147, hobby--Zoology. Their assistant Major Donald West, was the same young man who last year rocked the scientific community with his theories regarding other planets fitness for human habitation.
